CENTRAL LAND COMP NY'S ADVERTISEMENT.

THE CITY

The City of Huntington, which is situated on the south bank of the Ohio rive immediately below the mouth of the Guyandotte, having a frontage of nearly four-miles on the Ohio, and of one mile on the Guyandotte, has been carefully surveyed and a large part of it laid out into lots suitable for residences and for manufacuring, mercantile and other business purposes.

This property possesses advantages which are attracting to it a large population. Some of these advantages are as follows, viz: (1). It is situated at the head of reliable navigation on the Ohio river, being below the Guyandotte Bar and the numerous other shouls above, which prevent the cassage of boats of large tonnage during the summer months; and also below the point where ice prevents navigation is the winter months, and thus has direct

Chesapeake & Ohio Railroad,
Which, as a Great East-and-West Trunk Line, by reason of its short line, cas

and here will be established the principal machine, manufacturing and repair shops of the Company, contracts for which have already been awarded and work on these commenced. Important railroad connections with the Southwest will also be made at this point; and within a very few years it will be the terminus of six or several important railroads, connecting with the Chesapeake & Ohio railroad and each other.

(3). As a manujacturing centre, the city of Huntington has advantages which are unequalled at any other point in the valley of the Ohio. It is in the immediate vicinity of the extensive iron beds of Southern Ohio and West Virginia; and the opening of he Chesapeake and Ohio railroad will give easy and cheap access to the inexhaustible coal fields of the Great Kanawha and its tributaries, which are known to be superior to all others in the United States for the variety, the superior

of easy accessibility. The region is celebrated for the great abundance and excellen quality of its kickory and oak.

(4) As a commercial centre, the city of Huntington will occupy an important position on the Great Trunk Line of Railway, which the Chesapeake and Ohio Railroad and its connections will form between the deep waters of the Chesapeake Bay and the great rivers of the West at the head of reliable navigation, and it will therefore become a natural and convenient point for the interchange, on an extensive scale, of the west stables of the West and Southwest and the products of the manufacture. the great staples of the West and Southwest and the products of the manufactur

In addition to the natural beauty for which the site is remarkable, and its genial, healthful climate, the proprietors have at great cost, laid out the city upon a plan intended to secure for a large, industrious and thriving population every possible advantage of convenience, comfort and arrangement for the gratification of refined and cultivated taste. With these objects in view, the Avenues and Streets have all been made of sufficient width to allow the cultivation of ornamental trees, and yet leave abundant room for roadway and sidewalks.

Each lot intended for a residence is large enough to allow space for the cultimished for all kinds of farnace work and vation of a garden, fruit trees and shrubbery. On the Avenues where it is supposed lots will be selected for the better class of residences, lots will only be sold subject to conditions which will forever prevent nuisances in the vicinity.

subject to conditions which will forever prevent nuisances in the vicinity.

A system for grades for all the avenues and streets has been established upon a plan which can be easily and economically adopted, and which is adapted for live Works, West Stockbridge, Mass. 1929

purchase, with interest at six per cent per annum on the deferred payments, and the Ohio River, and rising hill land back.—
